PROFESSIONAL SUMMARY

Results-driven **React Native Developer** with **4+ years of experience** designing, building, and deploying cross-platform mobile applications for Android and iOS. Proficient in **React Native (CLI & Expo)**, **TypeScript/JavaScript (ES6+)**, **Redux Toolkit**, **Node.js**, **GraphQL**, and **REST APIs**. Experienced in **Agile/Scrum** environments with distributed teams across time zones. Familiar with **GitHub Copilot** and modern AI-assisted development workflows. Proven track record of improving app performance, reducing crash rates, and delivering features on schedule.

TECHNICAL SKILLS

Mobile Development	React Native (CLI & Expo), React.js, React Navigation, Android (Java/Kotlin basics), iOS (Swift basics)
Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
State Management	Redux Toolkit, Redux Thunk, Redux Saga, Context API,
Backend & APIs	Node.js, Express.js, REST APIs, GraphQL, MongoDB
Cloud & Integrations	Firebase (Auth, Crashlytics, Analytics, FCM), Twilio, Socket.io, Razorpay, PhonePe
AI & Advanced	OCR, Speech-to-Text, NLP Integration, Barcode/Image Recognition, Face Scan API
DevOps & CI/CD	Git, GitHub, GitHub Actions, Fastlane, App Store & Play Store Deployment
Dev Tools	VS Code, Android Studio, Xcode, Postman, GitHub Copilot, Cursor, Claude Code,Antigravity
Testing	Jest, React Native DevTools,, Logcat (Android)
Practices	Agile/Scrum, Code Review, Cross-timezone Collaboration, Performance Optimization

PROFESSIONAL EXPERIENCE

React Native Developer Nov 2021 – Present
Archents IT India Pvt Ltd — Hyderabad

Core Development & Architecture

- Built and shipped **Cianahealth** and **Cianacare** — production-grade cross-platform health apps on Android & iOS using **React Native CLI**.
- Reduced app load time and crash rates through code optimisation and **Redux Toolkit**-based state management.
- Designed a reusable component library using **Higher-Order Components (HOCs)**, enabling a scalable and maintainable codebase.
- Implemented secure **OTP-based authentication** and role-based access control for robust user verification.
- Collaborated in **Agile/Scrum sprints** with distributed and offshore team members, consistently meeting delivery timelines across time zones.
- Adopted **GitHub Copilot** and AI-assisted coding tools (Cursor, Claude Code) into daily workflow, improving development velocity.

API Integrations & Backend Connectivity

- Consumed and integrated **REST APIs** and **GraphQL** endpoints via **Node.js/Express.js** backends, managing complex asynchronous data flows.
- Integrated **Twilio** for real-time video consultations and **Socket.io** for secure live doctor-patient chat.
- Integrated **Razorpay** and **PhonePe** payment gateways, achieving a 98% transaction success rate.
- Enabled wearable device connectivity for real-time health data synchronisation with the mobile app.

AI, NLP & Advanced Health Monitoring

- Integrated **Face Scan Analysis** API for monitoring 21 vital health metrics and SPO2 levels in real time.
- Implemented **OCR**, **Speech-to-Text**, and **NLP** features to automate data extraction and enhance accessibility.
- Built intelligent food logging using **barcode scanning** and **image recognition** for automated nutritional data entry.

Nutrition, Wellness & Deployment

- Engineered a full **Calorie Tracker** with macronutrient logging, trend charts, and historical intake views.
- Built a **Medication Reminder** and Drug Interaction Checker to improve patient adherence and safety.
- Designed a personalised **Meal Plan generator** tailored to user health goals and genetic profiles.
- Managed end-to-end **App Store (iOS)** and **Play Store (Android)** deployments using **Fastlane** and **GitHub Actions**, ensuring full platform compliance.

PROJECTS

Cianacare | [Play Store](#) | [App Store](#)

- Cross-platform **React Native** health monitoring app with AI-driven vital tracking, real-time video consultations (Twilio), live chat (Socket.io), and payment integration (Razorpay/PhonePe) and OCR/NLP-powered data entry..

Cianahealth | [Play Store](#) | [App Store](#)

- Comprehensive wellness platform featuring nutrition tracking, personalised meal planning, wearable device integration.

EDUCATION

Bachelor of Engineering — Electronics & Communication Engineering

2015 – 2019

K. Ramakrishnan College of Engineering, Tiruchirappalli

LANGUAGES

Tamil | English | Telugu
