

Gowrishankar K

Senior Software Engineer — React Native

Chennai, India | +91-7373961627 | gowrishankarkrce@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven **Senior Software Engineer** with **5 years of experience** designing, building, and deploying cross-platform mobile applications for Android and iOS. Proficient in **React Native (CLI & Expo)**, **TypeScript/JavaScript (ES6+)**, **Redux Toolkit**, **Turbo Modules**, **Node.js**, **GraphQL**, and **REST APIs**. Currently architecting a unified single-codebase app for Bharat Matrimony and its regional-language platforms. Experienced in **Agile/Scrum** with distributed teams across time zones and in AI-assisted development workflows. Proven track record of improving app performance, reducing crash rates, and delivering features on schedule.

TECHNICAL SKILLS

Mobile Development: React Native (CLI & Expo), Turbo Modules (New Architecture), React.js, React Navigation, Android (Java/Kotlin basics), iOS (Swift basics)

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

State Management & Storage: Redux Toolkit, Redux Thunk, Redux Saga, Context API, MMKV

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, MongoDB

Cloud & Integrations: Firebase (Auth, Crashlytics, Analytics, FCM), APNs (Push Notifications), Twilio, Socket.io, Razorpay, PhonePe

AI & Advanced: OCR, Speech-to-Text, NLP Integration, Barcode/Image Recognition, Face Scan API

DevOps & CI/CD: Git, GitHub, GitHub Actions, Fastlane, PNPM, App Store & Play Store Deployment

Dev Tools: VS Code, Android Studio, Xcode, Postman, GitHub Copilot, Cursor, Claude Code, Antigravity

Testing: Jest, React Native DevTools, Logcat (Android)

Practices: Agile/Scrum, Code Review, Cross-timezone Collaboration, Performance Optimization

PROFESSIONAL EXPERIENCE

Senior Software Engineer — *Matrimony.com, Chennai*

Aug 2026 – Present

- Building a unified, **single-codebase React Native (CLI)** application from scratch for **Bharat Matrimony** and all associated regional-language matrimony platforms across Android and iOS.
- Architecting the application foundation with **PNPM** for fast, consistent dependency management and **Redux** for scalable, centralised state management.
- Optimising app performance and load times using **Turbo Modules** for efficient JS-to-native communication and **MMKV** for high-speed local storage.
- Integrating **Twilio** to deliver real-time user-to-user video calling.
- Implementing reliable cross-platform push notifications using **Firebase (FCM)** and **APNs**.

Software Engineer L3 — *Archents IT India Pvt Ltd, Hyderabad*

Nov 2021 – Aug 2026

Core Development & Architecture

- Built and shipped **Cianahealth** and **Cianacare** — production-grade cross-platform health apps on Android & iOS using **React Native CLI**.
- Reduced app load time and crash rates through code optimisation and **Redux Toolkit**-based state management.
- Designed a reusable component library using **Higher-Order Components (HOCs)**, enabling a scalable, maintainable codebase.
- Implemented secure **OTP-based authentication** and role-based access control for robust user verification.
- Collaborated in **Agile/Scrum sprints** with distributed and offshore teams, consistently meeting delivery timelines across time zones.
- Adopted **GitHub Copilot**, **Cursor**, and **Claude Code** into the daily workflow, improving development velocity.

API Integrations & Backend Connectivity

- Integrated **REST APIs** and **GraphQL** endpoints via **Node.js/Express.js** backends, managing complex asynchronous data flows.
- Integrated **Twilio** for real-time video consultations and **Socket.io** for secure live doctor-patient chat.
- Integrated **Razorpay** and **PhonePe** payment gateways, achieving a **98% transaction success rate**.
- Enabled wearable device connectivity for real-time health data synchronisation with the mobile app.

AI, NLP & Health Monitoring

- Integrated a **Face Scan Analysis** API to monitor 21 vital health metrics and SpO2 levels in real time.
- Implemented **OCR**, **Speech-to-Text**, and **NLP** features to automate data extraction and improve accessibility.
- Built intelligent food logging using **barcode scanning** and **image recognition** for automated nutritional data entry.

Nutrition, Wellness & Deployment

- Engineered a full **Calorie Tracker** with macronutrient logging, trend charts, and historical intake views.
- Built a **Medication Reminder** and Drug Interaction Checker to improve patient adherence and safety.
- Designed a personalised **Meal Plan generator** tailored to user health goals and genetic profiles.
- Managed end-to-end **App Store (iOS)** and **Play Store (Android)** deployments using **Fastlane** and **GitHub Actions**, ensuring full platform compliance.

PROJECTS

Cianacare | Play Store | App Store

- Cross-platform **React Native** health monitoring app with AI-driven vital tracking, real-time video consultations (Twilio), live chat (Socket.io), payments (Razorpay/PhonePe), and OCR/NLP-powered data entry.

Cianahealth | Play Store | App Store

- Comprehensive wellness platform featuring nutrition tracking, personalised meal planning, and wearable device integration.

EDUCATION

Bachelor of Engineering — Electronics & Communication Engineering

2015 – 2019

K. Ramakrishnan College of Engineering, Tiruchirappalli
