Summary

Results-driven React Native Developer with 4+ years of experience building and deploying cross-platform mobile applications for Android and iOS. Skilled in React Native, Redux, Firebase, and Node.js, with a strong focus on performance optimization, scalability, and user experience. Proven track record of improving app performance, reducing crashes, and enhancing UI responsiveness.

Technical Skills

Mobile: React Native (CLI & Expo), React Navigation, Android (Java/Kotlin basics), iOS (Swift basics)
State Management: Redux Toolkit, Redux Thunk, Redux Saga, Context API
Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, GraphQL, MongoDB
Dev Tools & IDEs: Xcode, Android Studio, VS Code, Postman, Cursor, Antigravity, Claude code, Codex
Version Control & CI/CD: Git, GitHub, GitHub Actions, Fastlane
Cloud & Integrations: Firebase (Auth, Crashlytics, Analytics, FCM), Twilio, Socket.io, Razorpay, PhonePe
Testing & Debugging: Jest, React Native DevTools, Chrome DevTools, Logcat (Android)
AI & Advanced: OCR, Speech-to-Text, NLP integration, Barcode/Image recognition, Face Scan API
Practices: Agile/Scrum, Code Review, App Store & Play Store Deployment

Professional Experience

React Native Developer

Nov 2021 – Present

Archents IT India Pvt Ltd

Hyderabad

Core Development & Architecture

- Developed and deployed cross-platform apps (Cianahealth, Cianaicare) using React Native for Android and iOS
- Improved app load time and reduced crash rates through code optimization and Redux-based state management
- Developed reusable components and implemented Higher-Order Components (HOCs) to ensure a scalable and maintainable code architecture
- Implemented secure OTP-based authentication for robust user verification
- Collaborated in an Agile/Scrum environment to ensure on-time sprint delivery and feature rollouts

AI, NLP & Advanced Health Monitoring

- Incorporated advanced AI-driven tools, including Face Scan Analysis for 21 vital metrics and SPO2 Monitoring
- Integrated NLP features, OCR (Optical Character Recognition), and Speech-to-Text to enhance accessibility and automate data extraction
- Integrated intelligent food logging using barcode scanning and image recognition to automate nutritional data entry
- Implemented Twilio-based video consultations and Socket.io for secure, real-time doctor-patient communication and chat

Nutrition & Wellness Modules

- Engineered a comprehensive Calorie Tracker allowing users to log food, monitor macronutrients, and view historical intake trends
- Developed a Weight Tracking system with visual analytics and charts to monitor health progress
- Built a Medication Reminder feature and Drug Interaction Checker to improve patient adherence and safety
- Designed a personalized Meal Plan generator tailored to user health goals and genetic profiles

Integrations & Deployment

- Enabled wearable device connectivity for real-time health data synchronization
- Integrated Razorpay and PhonePe payment gateways, maintaining a 98% success rate
- Managed end-to-end App Store and Play Store deployments, ensuring full compliance with platform standards

Education

Bachelor of Engineering in Electronics and Communication Engineering

2015 – 2019

K. Ramakrishnan College of Engineering

Tiruchirappalli

Projects

Cianaicare | Play Store | App Store

- Cross-platform health monitoring application with AI-driven features and real-time doctor consultations

Cianahealth | Play Store | App Store

- Comprehensive wellness platform with nutrition tracking, meal planning, and wearable device integration

Languages

Tamil, English, Telugu
